¹ Coverage assumes vaccines are administered according to current ACIP recommendations. Most health plans cover the ACIP recommended vaccines for adults but providers should check patients' health plans to verify.

² Medicare Part D coverage applies to vaccinations given in the pharmacy or the office settings. If given in the office, claims should be submitted either through a web-based claims service like TransactRx or via paper claim submitted by the patient. In the case of the latter, office staff should collect payment from patient at the time of administration.
